SUMMARY

Final-year BSc Information Technology student at North-West University with practical experience in software development, database design, and collaborative system building. I am currently working as a Junior Developer, contributing to business systems and data-driven applications. Interested in backend development, database systems and building reliable software systems.

TECHNICAL SKILLS

- **Languages:** Java, Python, C#, C++, JavaScript
- **Web Technology:** Node.js, HTML, CSS
- **Databases:** PostgreSQL, MySQL, Oracle
- **Tools:** GitHub, VS Code, PgAdmin4, Cisco Packet Tracer

PROFESSIONAL EXPERIENCE

Junior Developer (Remote) - Cannafrica **February 2026 - Present**

Contributed to the development of business systems, focusing on backend modules, database integration, and features including biometric scanning and membership management. Built a Supplier Management module using Node.js & PostgreSQL, & supported database design, testing, debugging, & documentation. Also conducted research on Apple and Google Wallet integrations & collaborated with team members through technical discussions & feedback.

Systems Analysis & Design Student Assistant - North-West University **March 2026 - Present**

Assisted students with Systems Analysis and Design coursework, providing guidance on system development concepts, requirements analysis, and project documentation. Supported students in understanding technical material while developing strong communication, collaboration, and problem-solving skills

Tech Consultant - CogniHeroes Academy **October 2025 - December 2025**

Recommended digital tools & provided technical support to improve workflows & resolve hardware & software issues. Assisted in addressing system & usability challenges while advising on technology adoption to enhance efficiency in a non-technical business environment.

UI Programming Student Assistant **July 2025 - November 2025**
North-West University

Assisted with academic support and assessment-related tasks, including marking scripts according to lecturer guidelines and supervising tests and assessments. Guided students during practical sessions by answering questions, explaining difficult concepts, and helping them complete coursework effectively. Also supported administrative and organisational tasks to help ensure smooth-running classes and structured learning sessions.

Mathematics Peer-Assisted Learning Assistant **March 2025 - June 2025**
North-West University

Supported distance-learning students by communicating coursework updates, deadlines, and module-related information. Assisted students with clarifying instructions and navigating academic requirements, while serving as a liaison between students and the lecturer. Also managed marking and record updates, and reported student performance trends to support academic progress monitoring.

Basic Computer Skills Assistant **February 2025 - March 2025**
North-West University

Assisted students in developing foundational computer literacy skills, including the use of Microsoft Word, Excel, PowerPoint, Outlook, and Microsoft Teams. Guided students through everyday computer tasks, file management, and software navigation while adapting support to different skill levels. Also helped troubleshoot basic technical issues and supported students in building confidence with digital tools.

PROJECTS

Recycling Information System (Team Project)

Designed and developed a full information system from scratch over a year. Led UI/UX design and ensured usability and consistency across the system. Oversaw code contributions from team members to maintain quality and structure.

Logistics & Warehouse Database System (Ongoing)

Building a database system for a company distributing apparel by South African artists. Designing structured relational databases and managing data flow for logistics operations. Collaborating in a team environment to implement real-world business requirements.
