SUMMARY

Final-year BSc Information Technology student at North-West University with practical experience in software development, backend systems, relational databases and collaborative application development. Previously worked as a remote Junior Developer, contributing to business system functionality, backend development, database integration, testing and debugging. Hands-on experience with Node.js, Express.js, JavaScript, TypeScript, SQL, and PostgreSQL, alongside full-stack development and systems analysis projects. I am quick to learn new technologies and comfortable collaborating with development teams using Git-based workflows.

TECHNICAL SKILLS

- **Languages:** Java, Python, C#, C++, JavaScript, TypeScript
- **Web Technology:** React, Node.js, HTML5, CSS3, REST APIs, Vite, Express.js
- **Databases:** PostgreSQL, MySQL, Oracle, SQL, Relational Database Design
- **Tools:** GitHub, VS Code, Visual Studio, PgAdmin4, Docker

---

PROFESSIONAL EXPERIENCE

February 2026 - July 2026

Junior Developer (Remote) - Cannafrica

Contributed to the development of business systems, focusing on backend modules, database integration, and features including biometric scanning and membership management. Developed a Supplier Management module using Node.js & PostgreSQL, & supported database design, testing, debugging, & documentation. Also conducted research on Apple and Google Wallet integrations & collaborated with team members through technical discussions & feedback.

Systems Analysis & Design Student Assistant - North-West University

March 2026 - July 2026

Assisted students with Systems Analysis and Design coursework, providing guidance on system development concepts, requirements analysis, and project documentation. Supported students in understanding technical material while developing strong communication, collaboration, and problem-solving skills

Tech Consultant - CogniHeroes Academy **October 2025 - December 2025**

Recommended digital tools & provided technical support to improve workflows & resolve hardware & software issues. Assisted in addressing system & usability challenges while advising on technology adoption to enhance efficiency in a non-technical business environment.

UI Programming Student Assistant **July 2025 - November 2025**
North-West University

Assisted with academic support and assessment-related tasks, including marking scripts according to lecturer guidelines and supervising tests and assessments. Guided students during practical sessions by answering questions, explaining difficult concepts, and helping them complete coursework effectively. Also supported administrative and organisational tasks to help ensure smooth-running classes and structured learning sessions.

Basic Computer Skills Assistant **February 2025 - March 2025**
North-West University

Assisted students in developing foundational computer literacy skills, including the use of Microsoft Word, Excel, PowerPoint, Outlook, and Microsoft Teams. Guided students through everyday computer tasks, file management, and software navigation while adapting support to different skill levels. Also helped troubleshoot basic technical issues and supported students in building confidence with digital tools.

PROJECTS

Logistics & Warehouse Database System - Team Project

Technologies: Relational database design, SQL

- Contributed to the design of a database system for a business distributing apparel created by South African artists.
- Structured relational data to support logistics and warehouse operations.
- Collaborated with team members to translate business requirements into database structures and data-management processes.

Assistant Application & Claims Management System (AACMS) — Team Project

Technologies: React, Vite, Node.js, Express.js, PostgreSQL, Docker, GitHub

- Contributed to the development of a full-stack web application for managing assistant applications and claims.
- Participated in frontend, backend, and database integration within a collaborative development environment.
- Contributed to system documentation, business requirements, functional specifications, technical specifications, and workflow design.
- Used GitHub-based version control to support team collaboration and project development.

Uber/Bolt Urban Transport Data Analysis - Team Project)

Technologies: Oracle Database, SQL, relational database design

- Contributed to the design and implementation of a relational database for South African urban transport data.
- Applied database normalisation principles, including Third Normal Form (3NF), to structure the database.
- Developed analytical SQL queries to investigate trip completion rates, cancellations, fare comparisons, and platform performance.
- Analysed operational and business data to produce insights and support evidence-based recommendations.
